

Smart Cities Stakeholder Platform

Sytze Dijkstra
ECN Policy Studies
2012 Annual Conference of Euroheat & Power and RHC-Platform
Copenhagen, 27 April 2012

1. Aims and principles
2. The Platform: structure and organisation
3. Outputs
4. Participation

Our consortium

GOPA-CARTERMILL

The University of Manchester

ISI

REGIONAL ENVIRONMENTAL CENTER

Aims

- Provide structure and content to the Smart Cities & Communities Initiative
- Establish communities of practice
- Develop concrete innovative solutions
- Facilitate the exchange of knowledge

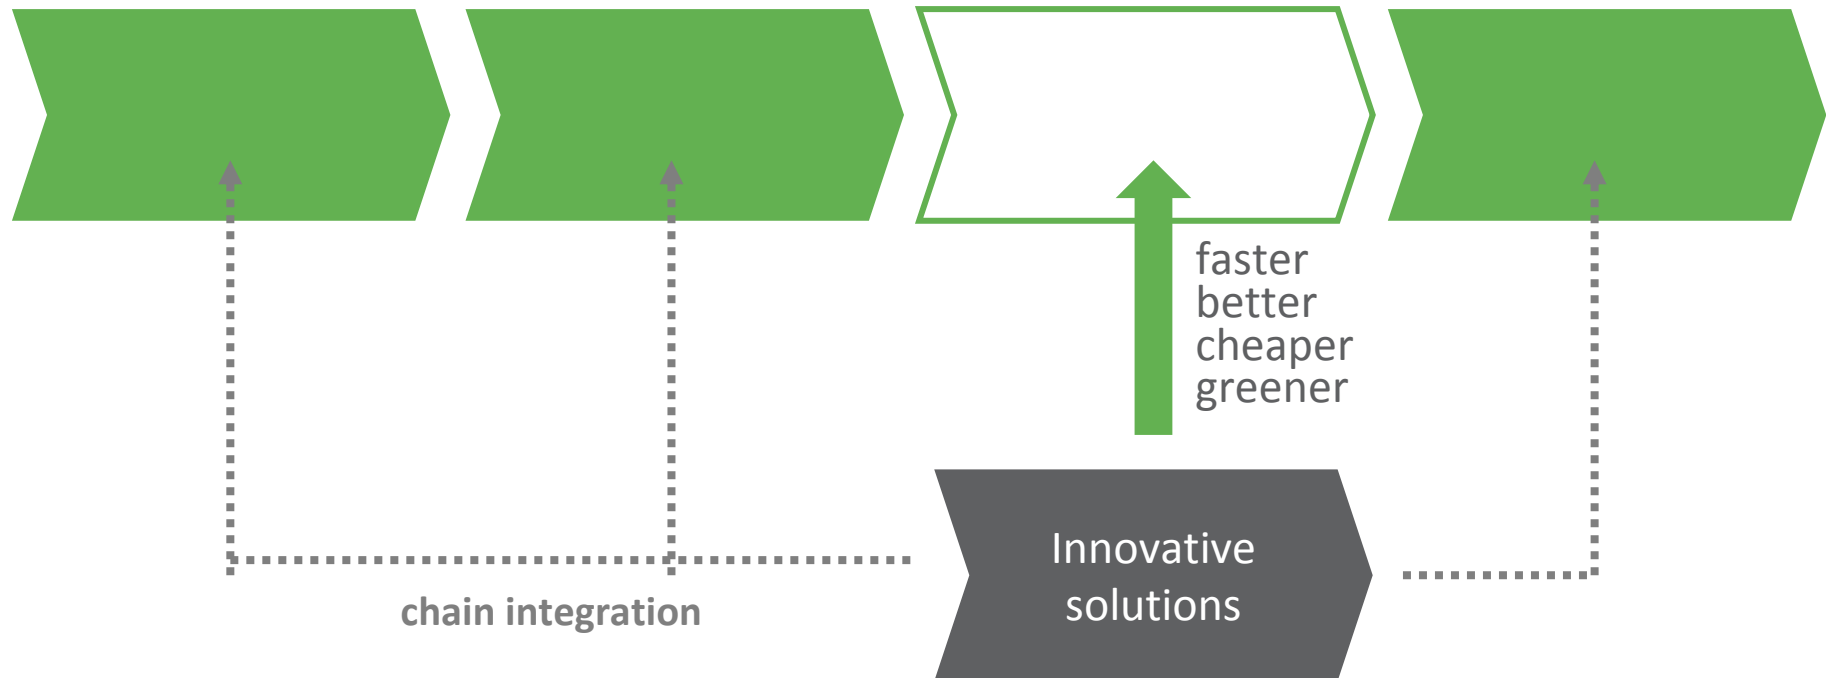

Guiding principles

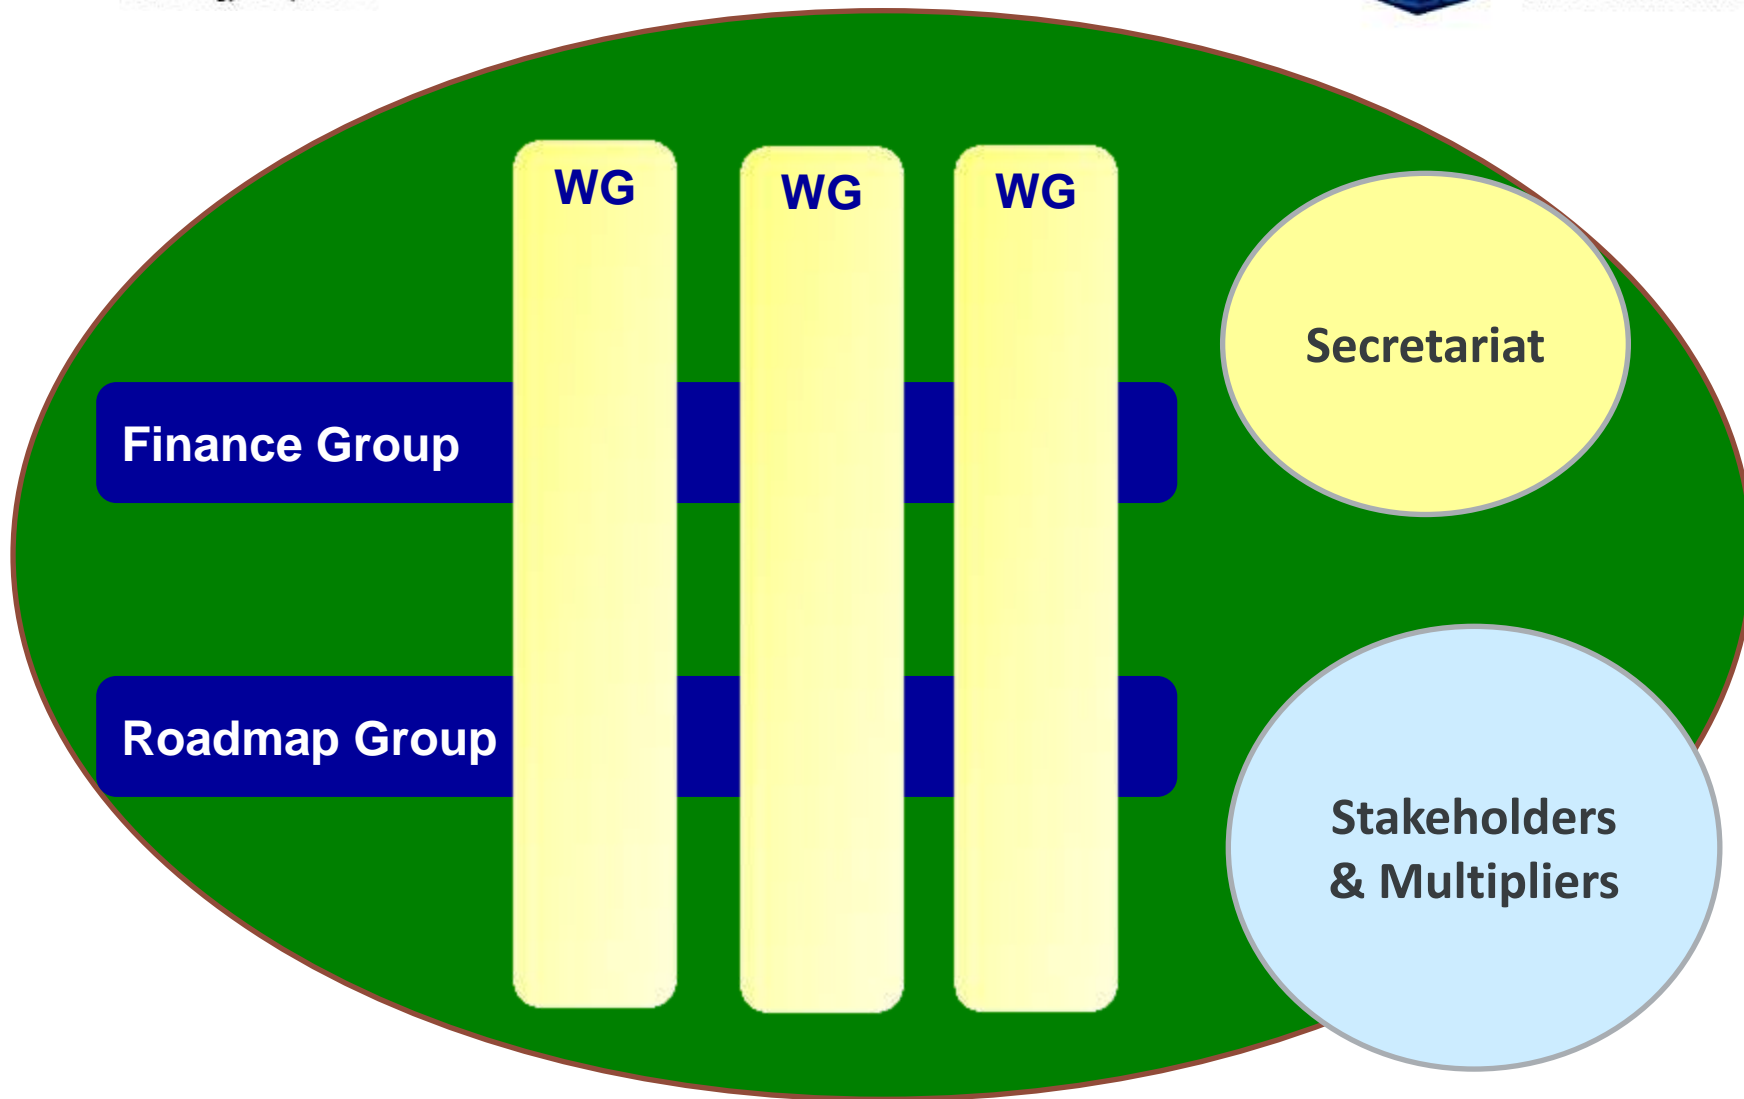

- Impartiality and independence
- Credibility
- Holistic approach
- Technological excellence
- Inclusiveness and participation

Making (new) energy processes work

Integrating working solutions in existing processes

Working Groups

TECHNOLOGY

- Energy supply & networks
- Energy efficiency - buildings
- Mobility and transport

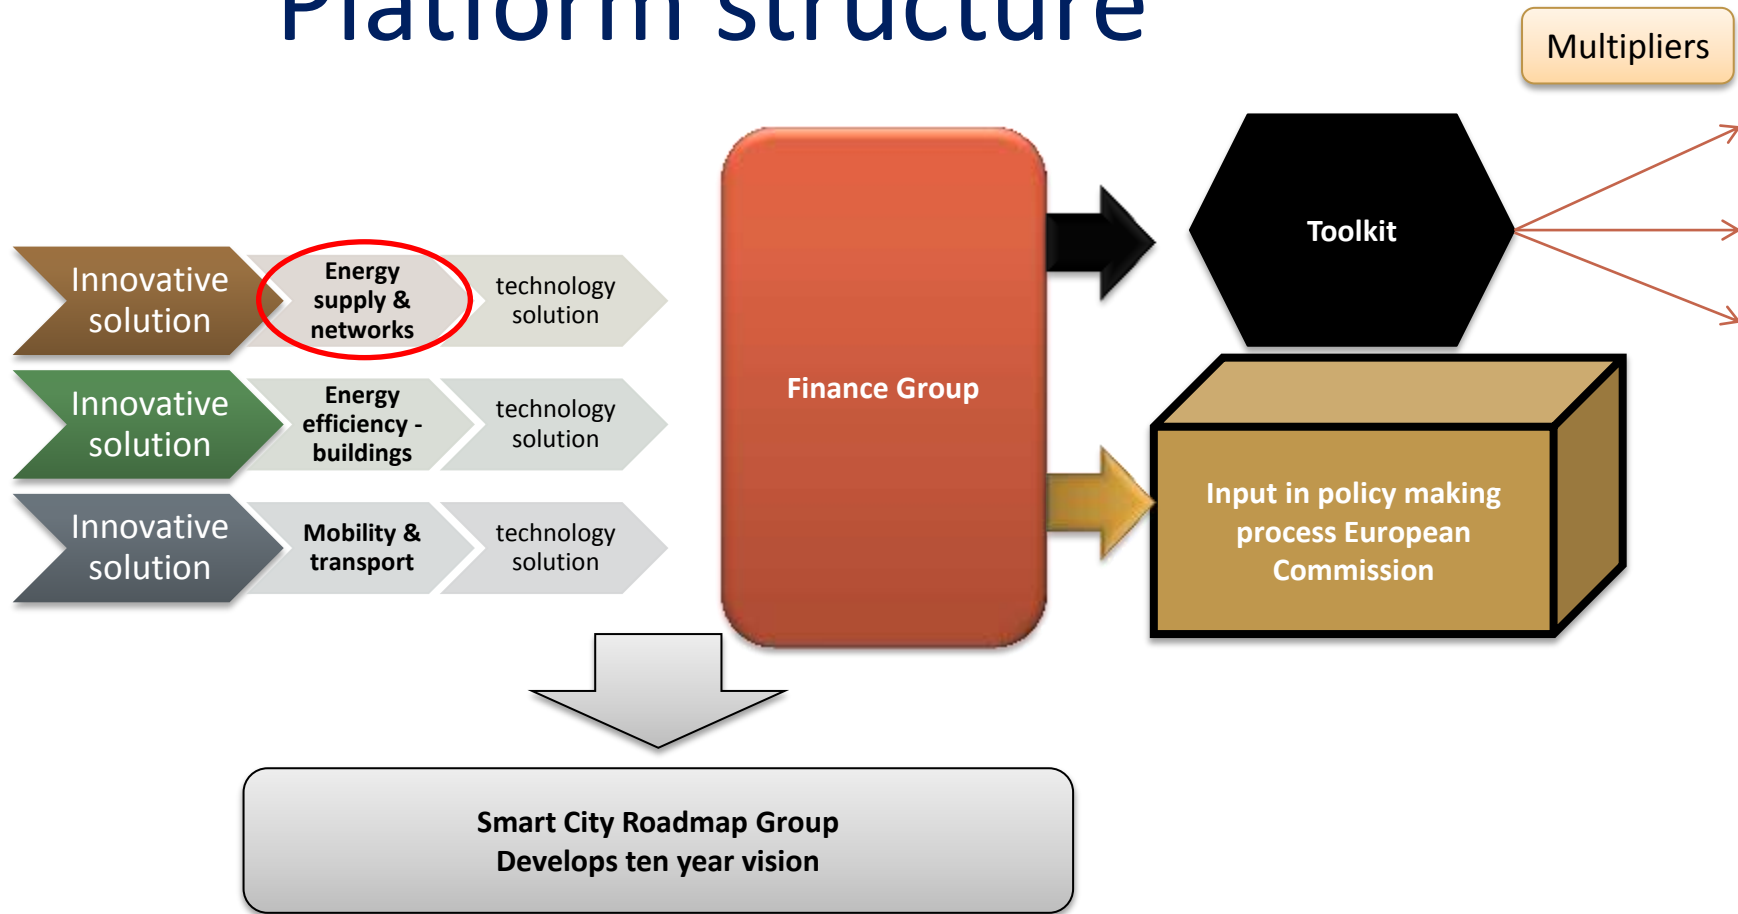

HORIZONTAL GROUPS

- Finance
- Smart Cities Roadmap

Platform structure

Balancing act

Excellent:
High quality outputs require
high quality inputs

- Working Groups upon invitation
- All contributions welcome
- The best ideas -> Working Groups
- Platform consultation process
- Networking & learning for all

Workable:
Working Groups cannot have
1000 members

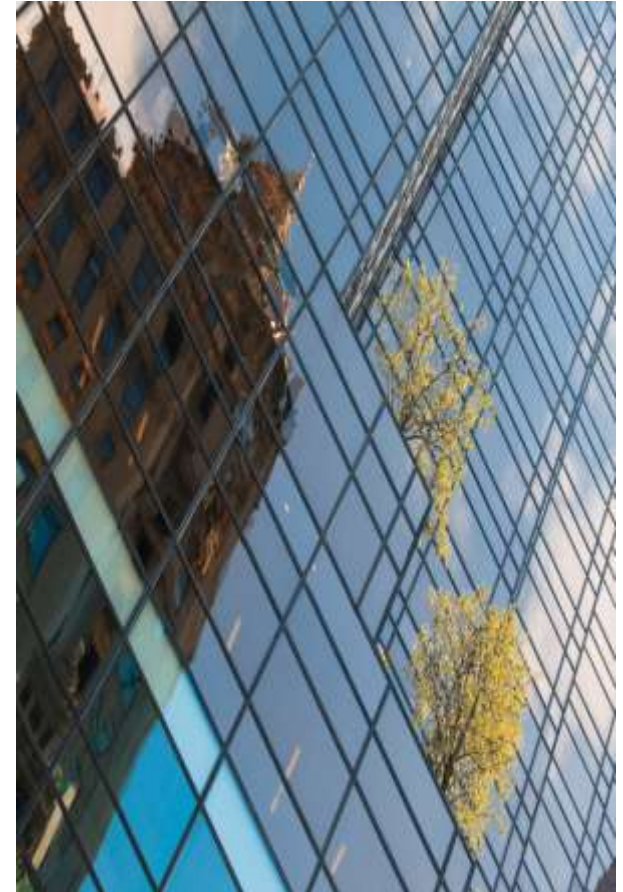

Open & inclusive:
Contribute innovation
solutions, best practices
Network, create projects

What we will deliver

- Solutions for cities: toolkits
- Advise on future calls and funding for promising solutions for smart cities
- Roadmap: 10 year vision
- Assemble high quality project proposals

- City profiles
- Innovations
 - Technology
 - Integration
 - Organisational & business processes
- Available funding
- Best practice
- Project ideas

Participate

- Shape the Working Groups and Platform Conferences
- Publish your profile
- Submit innovations, best practice or project ideas and match up
- Conceive and assemble project proposals
- Contribute to discussions and consultations
- Apply for Working Group membership
