

Viborg Fjernvarme

Viborg District Heating is a consumer owned distribution company established in 1953. The company works as a nonprofit distribution company under the Danish law of heat distribution.

Viborg District Heating consists of 320 km of pipes distributing heat for 8.900 consumers in Viborg, with 2,15 mill. m² heated area. The annual heat sale was 200 GWh and the annual heat loss was 60 GWh in 2014. The annual revenue was 163 mill. dkr. (21,5 mill. Euro) in 2014.

The company's main goal is to give our customers more value for less money.

And the strategy consists of four main areas.

- Competitiveness of product to gain more customers.
- Customer support to reduce customers consumption of energy.
- More efficient low temperature district heating system to reduce heat loss.
- A more efficient administration to be able to include more customers.

The company benefits from its works with different educational institutions, such as Danish Technical University and Alborg University, and is part of the futures 4 generation district heating www.4dh.dk
